Product Glossary

| | Product | Active Ingredient | Indication |
|---------|----------------|--|--|
| SI. No. | Cardiology | | |
| 1 | STATIX® | Atorvastatin 10/20/40/80 mg tablets | Controls elevated cholesterol levels |
| 2 | STATIX® F | Atorvastatin 10 mg + Micronised Fenofibrate 200 mg tablets | For Diabetic Dyslipidemia |
| 3 | STATIX® - EZ | Atorvastatin 10 mg + Ezetimibe 10 mg tablets | Controls extremely high levels of cholesterol |
| 4 | TELMISAT® | Telmisartan 20/40/80 mg tablets | Offers 24 hour blood pressure control |
| 5 | TELMISAT®-H | Telmisartan 40/80 mg + Hydrochlorothiazide 12.5 mg tablets | In uncontrolled Hypertension |
| 6 | TELMISAT® AM | Telmisartan 40 mg + Amlodipine 5 mg tablets | In Diabetic Hypertensives |
| 7 | ACTIBLOK - IPR | Metoprolol Immediate & Patterned Release 25/50/100 mg tablets | In patients of Hypertension, Angina, IHD and Heart Failure |
| 8 | ACTIBLOK AM® | Metoprolol Succinate IPR 25/50 mg +Amlodipine 5 mg tablets | In Uncontrolled Hypertension |
| 9 | BESTOR® | Rosuvastatin 5/10/20 mg tablets | For the management of Dyslipidemia and Atherosclerosis |
| 10 | BESTOR® FN | Rosuvastatin 10mg + Nanonized Fenofibrate 145 mg | In diabetes patients with combined hyperlipidmia |
| 11 | ZARGO® | Losartan Potassium 25/50 mg tablets | In hypertensive patients with CV co-morbidity |
| 12 | ZARGO® - H | Losartan Potassium 50 mg + Hydrochlorothiazide 12.5 mg tablets | In severe Hypertensive patients |
| 13 | MYOKINASE® | Recombinant Streptokinase for injection 1,500,000 IU | In patients of Acute Myocardial Infarction |
| 14 | DYNALIX® | Enoxaparin 40/60 mg Pre Filled Syringe | In patients of Acute Coronary Syndrome and Prophylaxis of Deep Vein Thrombosis |
| 15 | CLOTIDE® | Eptifibatide 10 ml bolus/100 ml for infusion | In ACS patients, undergoing Percutaneous Coronary Interventions |
| 16 | TIRO7FST™ | Tirozest HCL 5 mg/100 ml vial | In high risk ACS nationts with NSTEMI |

| Sl. No. | Diabetology | | |
|---------|-----------------------|--|---|
| | , | | INSUPen® is to be used only with Biocon's Insugen-R Refil™, |
| | IINSUPen® | | Insugen-N Refil™, |
| 1 | | INSUPen is a reusable insulin pen that can deliver insulin doses | Insugen-30/70 Refil™, |
| 1 | | from 1 unit (0.01mL) to 60 units (0.60 mL) in increments of 1 unit. | Insugen 50/50 Refil™ and |
| | | | BASALOG Refil™, |
| | | | refilled 3mL insulin cartridges |
| 2 | Insugen-30/70 Refil™ | Each ml contains Human Insulin (rDNA origin), 100 IU. | To reduce blood glucose levels in all types of diabetes. |
| 3 | Insugen-50/50 Refil™ | Each ml contains Human Insulin (rDNA origin), 100 IU. | To reduce blood glucose levels in all types of diabetes. |
| 4 | Insugen-N Refil™ | Each ml contains Human Insulin (rDNA origin), 100 IU. | To reduce blood glucose levels in all types of diabetes. |
| 5 | Insugen-R Refil™ | Each ml contains Human Insulin (rDNA origin), 100 IU. | To reduce blood glucose levels in all types of diabetes. |
| 6 | BASALOG Refil™ | Each ml contains Insulin Glargine (rDNA Origin), 100 IU. | To provide 24 hours basal insulin action in all types of diabetes |
| 7 | | Each ml contains Human Insulin (rDNA origin), IP 40 IU | To reduce blood glucose levels in all types of diabetes |
| 8 | | Each ml contains Human Insulin (rDNA origin), IP 40 IU | To reduce blood glucose levels in all types of diabetes |
| 9 | INSUGEN® N 40 IU | Each ml contains Human Insulin (rDNA origin), IP 40 IU | To reduce blood glucose levels in all types of diabetes |
| 10 | INSUGEN® R 40 IU | Each ml contains Human Insulin (rDNA origin), IP 40 IU | To reduce blood glucose levels in all types of diabetes |
| 11 | Insugen® 30/70 100 IU | Each ml contains Human Insulin (rDNA origin), IP 100 IU | To reduce blood glucose levels in all types of diabetes |
| 12 | | Each ml contains Human Insulin (rDNA origin), IP 100 IU | To reduce blood glucose levels in all types of diabetes |
| 13 | Insugen® N 100 IU | Each ml contains Human Insulin (rDNA origin), IP 100 IU | To reduce blood glucose levels in all types of diabetes |
| 14 | Insugen® R 100 IU | Each ml contains Human Insulin (rDNA origin), IP 100 IU | To reduce blood glucose levels in all types of diabetes |
| 15 | BASALOG® | Each ml contains Insulin Glargine (rDNA Origin) 100 IU | To provide 24 hours basal insulin action in all types of diabetes |
| 16 | BLISTO® | Glimepiride 1/2/4 mg | For monotherapy or combination therapy of type 2 diabetes |
| 17 | BLISTO MF® | Glimepiride 1 mg + Metformin 500 mg SR & Glimepiride 2/4 mg + Metformin 1000 mg SR | For type 2 diabetes inadequately controlled with a single drug |
| 18 | METADOZE-IPR® | Metformin 500/850 mg IPR | For monotherapy or combination therapy of type 2 diabetes |
| 19 | TriGPM® | Glimepiride 1/2 mg + Pioglitazone 15 mg + Metformin 500 mg ER | For type 2 diabetes inadequately controlled with a combination therapy of 2 drugs |
| 20 | ZUKER®-MF | Gliclazide 80 mg + Metformin 500 mg SR | For type 2 diabetes inadequately controlled with a single drug |
| 21 | PIODART® | Pioglitazone 15/30 mg | For monotherapy or combination therapy of type 2 diabetes |
| 22 | PIODART®-MF | Pioglitazone 15 mg + Metformin ER 500 mg | For type 2 diabetes inadequately controlled with a single drug |
| 23 | OLISAT® | Orlistat 60/120 mg | For weight reduction in overweight or obese people |
| 24 | GABIL® | Gabapentin 300 mg + Methylcobalamin 500 mcg | To reduce symptoms of diabetic neuropathy |
| 25 | GIVIAB" Plus | GLA 100 mg + Methylcobalamin 1500 mcg + ALA 100 mg + | Nutritional supplementation in patients with diabetes |
| | | Benfothiamine 100 mg + Elemental Zinc 15 mg | |
| 26 | VOLICOSE® | Voglibose 0.2/0.3 mg | To reduce post-prandial plasma glucose levels in patients with diabetes |
| 27 | METADOSE® V | Voglibose 0.2/0.3 mg+ Metformin 500 mg For type 2 diabetes | For type 2 diabetes inadequately controlled with a single drug |

| SI. No. | Nephrology | | |
|---------|------------------|--|---|
| 1 | ERYPRO safe™ | Recombinant Human Erythropoietin Alpha injection in strengths of | For the treatment of patients with anemia due to chronic renal failure, |
| • | ENTERO Sale | 2000/3000/4000/5000/6000/10000 IU | either on dialysis or not on dialysis |
| 2 | ERYPRO™ - Vial | Recombinant Human Erythropoietin Alpha 2000/4000/10000 IU | For the treatment of patients with anemia due to chronic renal failure, |
| | EIIII IIO VIGI | necombinant naman Er yamopotean rapha 2000/ 1000/ 1000/ 10 | either on dialysis or not on dialysis |
| 3 | ERYPRO™ – PREFIL | Recombinant Human Erythropoietin Alpha 2000/4000 IU | For the treatment of patients with anemia due to chronic renal failure, |
| | EMITIO THETTE | necombinant naman Eryamopoletin Apria 2000/4000 to | either on dialysis or not on dialysis |
| 4 | TACROGRAF™ | Tacrolimus .25/0.5/1/2 mg capsules | Prophylaxis of organ rejection in patients receiving allogenic liver, kidney or heart transplantation |
| _ | RENODAPT® | Mycophenolate Mofetil 250 mg capsules and 500/750 mg tablets | Prophylaxis of organ rejection in patients receiving allogenic renal, |
| 3 | RENODAFI | Mycophienolate Moretii 230 Hig capsules and 300/730 Hig tablets | heart or liver transplantation |
| 6 | RENODAPT®-S | Mycophenolic Acid 180/360 mg tablets | Prophylaxis of organ rejection in patients receiving allogenic renal transplantation |
| 7 | CYCLOPHIL ME® | Cyclosporine Oral Solution USP 100 mg/ml | Prophylaxis of organ rejection in kidney, liver and heart allogenic transplantation |
| , | (ORAL SOLUTION) | | |
| 8 | CYCLOPHIL ME® | Cyclosporine USP 25/50/100 mg capsules | Prophylaxis of organ rejection in kidney, liver and heart allogenic transplantation |
| 0 | RAPACAN™ | Sirolimus 1mg tablets | Prophylaxis of organ rejection in patients aged 13yrs or older receiving renal |
| 9 | NAFACAN | Silolinus Ting tablets | transplantation |
| 10 | Advacan™ | Everolimus 0.25/0.5 mg tablets | Prophylaxis of organ rejection in adult patients at low to moderate immunologic |
| 10 | Auvacan | Everoninus 0.25/0.5 mg tablets | risk receiving a kidney or cardiac transplantation |
| 11 | Narita™+ | Whey protein supplement fortified with vitamins and minerals, 200 gm tin | Nutritional supplement in patients of chronic renal failure, including patients on dialysis |
| 12 | biOSEV™ | Sevelamer HCl 400/800 mg tablets | Control of serum phosphorous in patients with chronic kidney disease on dialysis |
| 13 | NEPORIN™ | Heparin Sodium 5000/25000 IU | For adequate anticoagulation in haemodialysis |

| SI. No. | Oncotherapeutics | | |
|----------|--------------------|--|---|
| | | Nimotuzumab 200 mg humanized monoclonal antibody | For the treatment of locally advanced squamous cell carcinoma of head and neck, |
| 1 | BIOMAb EGFR® | targeting epidermal growth factor receptor | along with radiation and/or chemotherapy |
| 2 | Abraxane® | Paclitaxel protein-bound particles for injectable suspension (albumin-bound) | For the treatment of metastatic breast cancer |
| 3 | ERYPRO safe™ | Recombinant Human Erythropoietin Alpha 40000 IU | |
| 4 | NUFIL safe™ | Filgrastim (Recombinant Human Granulocyte Colony Stimulating Factor) 300 μg | For the treatment of chemotherapy induced neutropenia |
| 5 | NUFIL™ | Filgrastim (Recombinant Human Granulocyte Colony Stimulating Factor) 300 μg | For the treatment of chemotherapy induced neutropenia |
| 6 | NUFIL Sf™ | Filgrastim (Recombinant Human Granulocyte Colony Stimulating Factor) 300 μg | For the treatment of chemotherapy induced neutropenia |
| 7 | Genxtor® | Temsirolimus 25mg I.V | For the treatment of advanced renal cell carcinoma |
| 8 | Evertor™ | Everolimus 5 mg/10 mg For the treatment of patients with advanced renal cell carcinoma | |
| 9 | XORTIB™ | Capecitabine IP 150/500mg | Colorectal Cancer As a single agent for adjuvant treatment in patients with colorectal cancer Dukes' C Colon cancer who have undergone complete resection of the primary tumor • For the treatment of metastatic Breast Cancer In combination with Docetaxel for the treatment of patients with locally advanced or metastatic breast cancer after failure of prior anthracycline containing chemotherapy |
| l | | | Gastric Cancer For first-line treatment of advanced gastric cancer in combination with a platinum-based regimen |
| | | | Breast Cancer In combination with paclitaxel as first-line treatment of patients with metastatic breast cancer, after failure of prior anthracycline containing adjuvant chemotherapy, unless anthracyclines were clinically contraindicated. Non-Small Cell Lung Cancer |
| 10 | ATSURE* | Gemcitabine Hydrochloride - 200 mg/1 gm./ 1.4 gm. | In combination with Cisplatin for the first-line treatment of patients with inoperable locally advanced (Stage III A or IIIB) or metastatic (Stage IV) NSCLC. Pancreatic Cancer First-line treatment for patients with locally advanced (nonresectable Stage II or Stage III) or metastatic (Stage IV) adenocarcinoma of the pancreas. Also indicated for patients previously treated with 5-FU. Ovarian Cancer In combination with carboplatin for the treatment of patients with advanced ovarian cancer that has relapsed at least 6 months after completion of platinum-based therapy. |
| 11 | SYMYX™ | Pemetrexed 100/500 mg | Non-Small Cell Lung Cancer In combination with Cisplatin for the initial treatment of patients with locally advanced or metastatic nonsquamous NSCLC. For the maintenance treatment of patients with locally advanced or metastatic nonsquamous NSCLC whose disease has not progressed after four cycles of platinum-based first-line chemotherapy. As a single-agent for the treatment of patients with locally advanced or metastatic nonsquamous NSCLC after prior chemotherapy. Mesothelioma In combination with Cisplatin for the treatment of patients with malignant pleural mesothelioma whose disease |
| 12 | HUMIX* | Lenalidomide – 5/10/25 mg | Its unresertable or who are otherwise not randidates for curative surgery. Multiple Myeloma In combination with dexamethasone for the treatment of patients with multiple myeloma who have received at least one prior therapy Myelodysplastic Syndromes For the treatment of patients with transfusion-dependent anaemia due to low or intermediate 1-risk Myelodysplastic syndromes associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities. |
| 13 | ADNEXA® | Epirubicin Hydrochloride BP 10/50 mg | As a component of adjuvant therapy in patients with evidence of axillary node tumour |
| | | 1 1 | involvement following resection of primary breast cancer. |
| 14 15 | XTIDE® TAZENTA™ | Oxaliplatin USP 50/100 mg Bortezomib 2mg | For the treatment of advanced colorectal cancer For the treatment of patients with multiple myeloma in mantle cell lymphoma who have received at least 1 prior |
| 13 | INCONIA | DOI (CZOTIIIO ZITIG | therapy |
| 16 | XNTA™ | Bendamustine Hydrochloride 100 mg | Chronic Lymphocytic Leukaemia (CLL) For the treatment of patients with CLL Non-Hodgkin's Lymphoma For the treatment of patients with indolent B-cell non-Hodgkin's lymphoma that has progressed during or within six months of treatment with rituximab or a rituximab containing regimen |

| SI. No. | Immunotherapy | | |
|---------|---------------|---|---|
| | | Each vial contains 25 mg of itolizumab. | A novel biologic for the treatment of moderate-to-severe psoriasis. |
| 1 | ALZUMAb™ | Itolizumab is a humanized recombinant anti-CD-6 monoclonal antibody. | ALZUMAb™ is indicated for the treatment of patients with active moderate to severe chronic plaque psoriasis |
| | | Each mL contains 5 mg of itolizumab for intravenous use. | who are candidates for systemic therapy. |
| 2 | PICON® | Pimecrolimus cream 1% w/w | Mild to Moderate atopic Dermatitis |
| 3 | TBIS® | Tacrolimus ointment 0.03%/0.1% w/w | Moderate to Severe Dermatitis |
| 4 | CALPSOR™ | Calcipotriol ointment 0.005%w/w | Mild to Moderate Plaque Psoriasis |
| 5 | CALPSOR™C | Calcipotriol ointment 0.005%w/w + Clobetasol Propionate 0.05% w/w | Moderate to Severe Plaque Psoriasis |
| 6 | PSORID™ | Cyclosporin capsules 25/50/100 mg Cyclosporin oral solution 100 mg/ml | Severe Psoriasis |
